PROFILE

Highly motivated QA Automation Engineer with over a decade of experience in delivering the highest quality in software, from both: backend (API) and frontend (E2E) sides. Carried out plenty of test automation projects from scratch. Reliable and principled professional who knows the ropes in his job.

EXPERIENCE

QA ENGINEER

2021 - 2023

Project: MyBenefit - platform for employees benefits management.

Tasks:

- First-line support for end-users, triage of the problems, and registration of tickets in the issue tracking system (Jira),
- Root cause analysis for the reported bugs,
- Re-tests of the fixes,
- Development and maintenance of the automated tests,
- Administration of the test infrastructure using the CLI and Jenkins console,
- Running pre-release tests (manual and automated) ,
- Maintaining test documentation and instructions,
- Trainings and presentations for other QAs in the team.

Technology stack: Java 8 (and upgrade to 11), Selenium 3, Junit 4, Jira, Jenkins, Linux CLI, PostgreSQL.

SENIOR SOFTWARE ENGINEER IN TESTS

2017 - 2020

Project: OpenPlatform - Middleware module for integrations between the main CRM system and external services.

Tasks:

- Automated and manual tests of the integrations API,
- Configuration and support for end-users,
- Performing the Scrum Master role in the Dev Team,
- Development and maintenance of the automated E2E tests for the integrations using Selenium and RESTAssured,
- Creating, maintaining, and running deployment scripts on the AWS cloud,
- Monitoring microservices using CloudWatch and the AWS CLI.

Technology stack: Java 8, Selenium 3, RESTAssured, TestNG, Jira, Confluence, Jenkins DSL, Terraform, MySQL.

QA ENGINEER - TEST AUTOMATION

2015 - 2017

Project: Selenium tests suite for a large CRM system: TalentLink.

Tasks:

- Developing automated tests in Java using Selenium,
- Re-writing manual tests into the automated ones,
- Monitoring the daily test results and raising bugs if needed,
- Integrated the RESTAssured framework within Selenium tests, for the test's setup,
- Trainings and presentations in front of the whole Engineering team.

Technology stack: Java 8, Selenium 3, RESTAssured, TestNG, Jira.

MAIN SKILLS

Selenium Advanced

Used in the most test automation projects, including private GitHub.

Java Medium

The main language used in the test automation projects. Last one migrated to v. 17

REST-Assured Basic

Used for test automation in Lumesse, Avra and private projects.

Postman Basic

Experience gained mainly from private projects.

SQL Medium

MySQL, Postgres, Oracle.

AWS Basic

Microservices deployments and log monitoring in Saba.

PEER REVIEWS

...He is a great colleague with a can-do attitude, on whom you can always count on. Adam has strong technical expertise in solutions integrations based on web services and on those where xml/xslt are frequently used. Additionally to that he is skilled in java programming and quality assurance automation...

...Adam stawia na wysoką jakość, jego analizy są bardzo szczegółowe, z zadań wyciąga jak najwięcej i daje z siebie więcej niż zadanie wymaga - przedstawiając raporty, analizy, wnioski i sugestie...

...He consistently demonstrated his commitment and vigor towards his work. His courage to accept challenges of various degrees of difficulty has been particularly impressive. More than once, Adam invested his personal time to understand subjects better, tackle issues and deliver tasks...
